Baldwin's Ahlbrandt launches its particle-free CleanSpec™ Corona electrode

Product designed for high-quality printing and manufacturing of food-grade and clean room applications

The CleanSpec electrode is tailored for high-quality, food-grade and clean room applications.

ST. LOUIS — June 17, 2020 — Baldwin Technology's Ahlbrandt System GmbH has announced that its new CleanSpec—the world's first and only particle-free Corona electrode—is ready to be shipped on demand within 24 hours from when an order is placed. Ahlbrandt sets the industry standard for high-efficiency Corona surface treatment systems, and the durable, future-proof CleanSpec offers a long service life, increased uptime and an optimal return on investment.

With a unique particle-free design that prevents metal powder contamination from damaged or broken elements, the CleanSpec is ideal for manufacturing processes in clean room applications, including high-quality food-grade plastic films and package manufacturing. This electrode can be integrated into new and existing production lines, and can be customized onsite to fit any Corona system length. For Ahlbrandt Corona systems, the CleanSpec electrode is integrated in the new Corona Pure, Pure XL, Flex and Slim product lines.

“We design Ahlbrandt's Corona innovations to maximize process uptime and simplify operations, as well as to optimize system delivery and installation,” said Holger Bätz, Managing Director, Ahlbrandt. “Our ability to ship the CleanSpec Corona electrode within 24 hours is of great value for manufacturers worldwide today.”

ABOUT BALDWIN TECHNOLOGY COMPANY INC.

Baldwin Technology Company Inc. is a leading global manufacturer and supplier of innovative process-automation equipment, parts, service and consumables for the printing, packaging, textile, plastic film extrusion and corrugated industries. As a total solutions provider, Baldwin offers our customers a broad range of market-leading technologies, with a focus on improving the economic and environmental efficiency of production processes. Through a global footprint of 21 company-owned locations and an extensive network of partners, our customers are supported globally, regionally and locally by dedicated sales and service team members who add value by forming long-term relationships. Baldwin is privately owned by BW Forsyth Partners, a Barry-Wehmiller company. For more, visit baldwintech.com.

ABOUT BW FORSYTH PARTNERS

BW Forsyth Partners is the investment arm of multibillion-dollar global manufacturing and engineering consulting firm Barry-Wehmiller. Established in 2009, BW Forsyth Partners blends Barry-Wehmiller's unparalleled legacy of value creation and people-centric culture development with keen investing experience to help companies realize their true potential. With a focus limited to areas known well, BW Forsyth Partners seeks to partner with leadership teams to acquire small- to middle-market companies in the capital and component equipment, and professional services sectors. In each of our operating companies, BW Forsyth Partners deploys operational improvements and strategy development without compromising the autonomy, strategic vision and entrepreneurial spirit of their leadership teams.
